

The California Solar Initiative (CSI) is for all market segments with the exception of New Residential Construction. The New Solar Homes Partnership (NSHP) is for the New Residential Construction market segment. The Emerging Renewables Program is for all market segments, and provides incentives for small wind turbines and fuel cells.

Depending on the accuracy of the meter there are two different routes to eligibility listing:

Non-revenue grade meters:

1. The meter must be self-certified by the manufacturer to an accuracy of +/- 5%.
2. Fill out the application form and submit by email.

Revenue grade meters

1. The meter must be certified to the accuracy of +/- 2% according to all applicable ANSI C-12 testing protocols. The certificate of accuracy must be performed by an NRTL.
2. Fill out application form and submit by e-mail along with the the certificate of accuracy.

All meters:

3. The manufacturer fills out the Energy Commission equipment application form, found here: http://gosolarcalifornia.org/equipment/documents/Equipment_Request.doc
4. Submit equipment application form (and documentation if revenue grade) to [KEMA, Inc.](#)

The meter eligibility list is updated monthly on the first of the month. The cut-off date for the monthly update is the 15th day of the preceding month; all documentation must be submitted before this date.
