

Version Change Details for version 2.5 of the NSHP CECPV Calculator

NSHP applications must use a version of the NSHP CECPV Calculator that is listed as “certified” on the date the NSHP application is postmarked (or date of submission for electronic NSHP applications). A list of certified versions of the CECPV calculator is maintained on the Energy Commission’s website. With each new release of the CECPV calculator, the previously certified version or versions will be “decertified” **no less than 30 days after the new CECPV calculator is released.**

Version 2.5 Released May 16, 2011

- No change to incentive calculation methodology. There should not be any incentive differences from version 2.4.
- Removed limitation on number of modules and inverters.
- Fixed discrepancy between per site incentive and per project incentive due to rounding. Per project incentive is now number of sites multiplied by rounded per site incentive.
- Label on TDV results corrected to indicate Annual TDV kBtu on both Results and Forms tabs.
- Fixed shading report data on Results tab for both "Neighboring Structure" options. The "-" mark for distance (which is not used for "Neighboring Structure") may have previously been displayed on an incorrect line.
- Fixed path problem when using calculator on a drive other than C:\
- Additional PV modules and inverters

Version 2.5, Update 1 Released June 22, 2011

- Additional PV modules and inverters

Version 2.5, Update 2 Released August 10, 2011

- Additional PV modules and inverters
